Professional Summary

Final-year Computer Science student (B.Tech, 2026) with production experience in full-stack engineering (React.js, Node.js, PostgreSQL) and AI integrations (LLMs, RAG, LangChain). Proven ability to ship scalable web applications, RESTful APIs, and responsive UIs in Agile, code-reviewed environments. Targeting SDE and Full-Stack AI Engineer roles.

Education

Prayag Institute of Technology & Management (AKTU)

Expected May 2026

B.Tech in Computer Science and Engineering | **CGPA: 8.0/10.0**

Prayagraj, India

Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, Software Engineering

Technical Skills

Languages: JavaScript (ES6+), Python, Java (Core), C++, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Zustand, React Query, React Hook Form, Axios

Backend & DB: Node.js, Express.js, REST APIs, MongoDB, PostgreSQL, Prisma ORM, JWT Auth

AI & LLM: Gemini API, OpenAI API, LangChain.js, RAG Pipelines, Pinecone (Vector Embeddings)

DevOps & Tools: Docker, Git, GitHub, Vercel, Railway, System Design Basics

Experience

Alphabetum Technology

Nov 2025 – May 2026

Software Development Engineer Intern

Remote

- Contributed to the product design and feature development of a configurable billing and accounting SaaS platform targeting healthcare providers, restaurant owners, and SMB managers – implementing modular invoice workflows, role-based access control, and multi-entity configuration support using Node.js, Express.js, and PostgreSQL.
- Designed and developed a multi-phase dynamic form system for the core company website spanning Services, Industries, and Hire-a-Developer user journeys – built with React.js, controlled component architecture, and client-side validation to improve lead conversion and user experience across funnel stages.
- Collaborated closely with a senior developer across full SDLC phases – contributing to system design discussions, writing unit-tested modules, performing API integration testing, and resolving bugs pre-release using structured debugging and Git-based version control workflows.

Projects

ReeCommerce – Full-Stack Social Commerce | *Next.js, Node.js, MongoDB, Socket.io*

Live | GitHub

- Architected a 3-tier social commerce platform merging short-form video content with integrated shopping flows for Buyers, Sellers, and Admins.
- Built scalable real-time seller dashboards and live order notifications using Socket.io, analyzing metrics like reel views, likes, and conversion rates.
- Designed query-optimized MongoDB schemas for hierarchical product catalogs and cart mapping, implementing role-differentiated access controls.

HireIQ – AI Recruitment Intelligence Platform | *Next.js, Node.js, LangChain, OpenAI, Pinecone*

GitHub | Live

- Developed a full-stack AI platform enabling semantic candidate search and automated resume parsing (PDF/DOCX) using natural language queries.
- Engineered a multi-step LangChain.js pipeline for JD alignment and gap analysis, storing high-dimensional vector embeddings in Pinecone for ultra-fast retrieval.
- Implemented real-time LLM streaming via Server-Sent Events (SSE) and deployed on Next.js App Router with MongoDB Atlas for scalable concurrent data processing.

MealMind – AI-Powered Nutrition Management | *React.js, Node.js, PostgreSQL, Prisma, Gemini API*

GitHub | Live

- Built a comprehensive SaaS platform for multi-location restaurant management featuring real-time order tracking, digital menus, and role-based operational dashboards.
- Integrated the Gemini API and built RAG pipelines over the food database to generate personalized weekly meal plans and natural language nutritional insights.
- Secured transactions with Razorpay subscriptions, implemented JWT rotation, and engineered Zod-validated REST APIs to guarantee strict data integrity.

Achievements & Activities

- **Algorithmic Problem Solving:** Solved 200+ LeetCode problems focusing on arrays, dynamic programming, and graphs to optimize time and space complexity.
- **Technical Leadership:** Managed and led a 4-member frontend team to successfully deliver the Intern Intelligence IPO platform against rigid release timelines.
- **Vishwakarma Hackathon (Top Finalist):** Built an event-driven, real-time digital factory simulation with live machine-state synchronization within a 24-hour sprint.
